DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 9 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Makino et al. (GB 2,350,238) cited by applicant.

Makino teaches a nonreciprocal isolator including: a common electrode (54) on a ferrite plate (55); three central conductors; a terminating resistor connected to the third conductor; matching capacitors (C1 and C2) are connected to the 1st and 2nd conductors and another (C3) is connected to the third conductor; and the capacitance of C3 is larger than C1 and C2 (e.g. see page 9, 1st paragraph).

Allowable Subject Matter

3. Claims 1-8 and 10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not teach the combination of features of the claimed invention including that the 3rd matching capacitor connected to the 3rd conductor has a Q factor of 200 or smaller and a capacitance of 18 pF or larger, and the matching capacitors connected to the 1st and 2nd conductors have Q factors of 400 or larger.
